

Food for Thought

Why should I support Indiana's livestock and grain farmers? Fewer farms in my community won't take food off my table. Or will it? Local livestock farm families represent Indiana grain farmers' largest customer for soybean meal. Create 42,000 jobs. Generate \$210 million in tax revenue for our local communities. And, were not dependent on a foreign country for our food. Its "Made in the USA."

We all have a stake on this dinner plate. Help keep Indiana's grain and livestock farmers open for business - breakfast, lunch and dinner.
